Unusual interest is aroused in the proposed exhibition because the drills in the past have been held in secret, and, although the Almas Temple is famed throughout the countries of the members is a model of the organization have been invited.

Temple is famed throughout the country for its proficiency in fancy evolutions, none but fraternal members have been permitted to witness their work. In the public exhibition to be held March 2 it is intended to exhibit the Patrol team in the new double time Zouave drill, during the course of which figures will be presented, including the former's percentage being 34.75, while the latter secured 30.64. The judges of the organization have been invited to attend, and a large audience is expected to be present.

Federal City Lodge won the banner from Eastern Lodge by a margin of a little more than 4 per cent, the former's percentage being 34.75, while the latter secured 30.64. The judges of the organization have been invited to attend, and a large audience is expected to be present.

Past High Chief Ruler Declares Order Committed to Prohibition.

Wayne W. Cordell, the sitting past high chief ruler of the Independent Order of Rechabites, in speaking of a reported disaffection of certain memers of the order from the cause of prohibition, said yesterday that the or-der in Washington was committed to prohibition by a resolution adopted at Tent. He further said that not more than 10 per cent of the 800 members in Washington had joined hands with the saloon allies. He contends that the obligation of the order makes it comp sory for members to discountenance the manufacture and sale of all intoxicating liquors, and that when a member advocates the sale of liquor he violates his obligation just as surely as if he

CHILE SALT.

The salt deposits of Chile are the greatest in the world. The Salar Grande mine, in the province of Tarapaca, about sixty miles south and east of Iquique, covers an area of \$9,000 acres to the depth of twenty-five feet. This body of salt is nearly pure, and contains more than 14,000,000,000 tons or enough to supply the world's demands for many decades. There are several other deposits in the interior that cover two or three times the area of the above.—Exchange.
